

## **1    ABSTRACT OF THE DISCLOSURE**

2            A barbecue grill has a stand, a body, a grid and an adjusting device. The  
3    body is attached to the top of the stand. The grid is adjustably mounted on the  
4    body with the adjusting device. The adjusting device has a shaft and a  
5    positioning device. The shaft is moveably extended through the body and is  
6    rotatably connected to the grid. The positioning device is mounted between the  
7    body and the grid and is connected to the shaft to hold the shaft at a desired  
8    position. Accordingly, the grid can be rotated away from the body when the user  
9    want to add charcoal into the body or pick the roasted food from the grid. The  
10   use of the barbecue grill is convenient and versatile.
